

PROJECT OVERVIEW.

Client: National Gallery of Victoria

SPACECUBE was thrilled to be involved in The 2021 NGV Triennial event at the National Gallery of Victoria. Multiple cubes and a mini cube were used throughout the venue as bars, cafes, a DJ booth, contact tracing and ticket office. All of the cubes were covered in a custom mirror finish and feature SPACECUBE's new servery awning, with one of the cubes operating a fully functional kitchen inside. SPACECUBE's new functional servery cube gives clients the opportunity to offer a high-end, fully functional commercial kitchen, complimented with SPACECUBE's new automated push-button servery awning. The food servery comes with some excellent high-grade commercial kitchen features including R10 food grade flooring with coving, floor to ceiling stainless steel splash back, commercial grade extraction, stainless steel benches, HVAC split system, plumbed sink and hand wash station and under bench fridges.

SPACECUBES

5 x Cubes and 1 x Mini Cube
