

A photograph of a modern, two-story glass building at dusk. The building has a curved corner and large glass panels that reflect the sky and show the interior. The interior is lit up, revealing a wooden floor, a central wooden pillar, and some furniture. A wooden deck with steps leads up to the entrance. In the foreground, there are some potted plants and a black metal railing. The sky is a deep blue. The text 'SPACECUBE.' is overlaid on the left side of the image in a bold, white and orange font.

SPACECUBE.

Changing the way
the world builds

THE SPACECUBE BUILD SYSTEM.

- SPACECUBE delivers **premium modular infrastructure** for events, commercial environments, healthcare and rapid deployment applications.
- By delivering premium, scalable, and sustainable modular solutions, SPACECUBE **transforms traditional construction** with our innovative SPACECUBE Build System®.
- Our systems are designed with elegant simplicity for versatility, providing adaptable, reusable, and **environmentally responsible spaces** that meet the highest standards of functionality and aesthetics.
- From global events to permanent infrastructure, SPACECUBE empowers businesses to **build smarter and faster** while reducing waste.

Scalable. Sustainable. Simpler.

CHANGING THE WAY THE WORLD BUILDS.

SPACECUBE.
Not Ordinary.

SCALABLE.

The SPACECUBE Build System® is **designed to scale effortlessly** — from compact single-module installations to large multi-level environments spanning thousands of square metres. Its modular kit-of-parts approach allows spaces to expand, adapt and evolve alongside operational needs, delivering flexible infrastructure without the limitations of traditional construction.

SIMPLER.

SPACECUBE simplifies the building process through an intelligent modular system **designed for speed, efficiency and flexibility**. From streamlined logistics and rapid installation to reconfiguration and relocation, our plug-and-play approach reduces complexity at every stage — enabling smarter delivery with less disruption, less waste and faster project outcomes.

SUSTAINABLE.

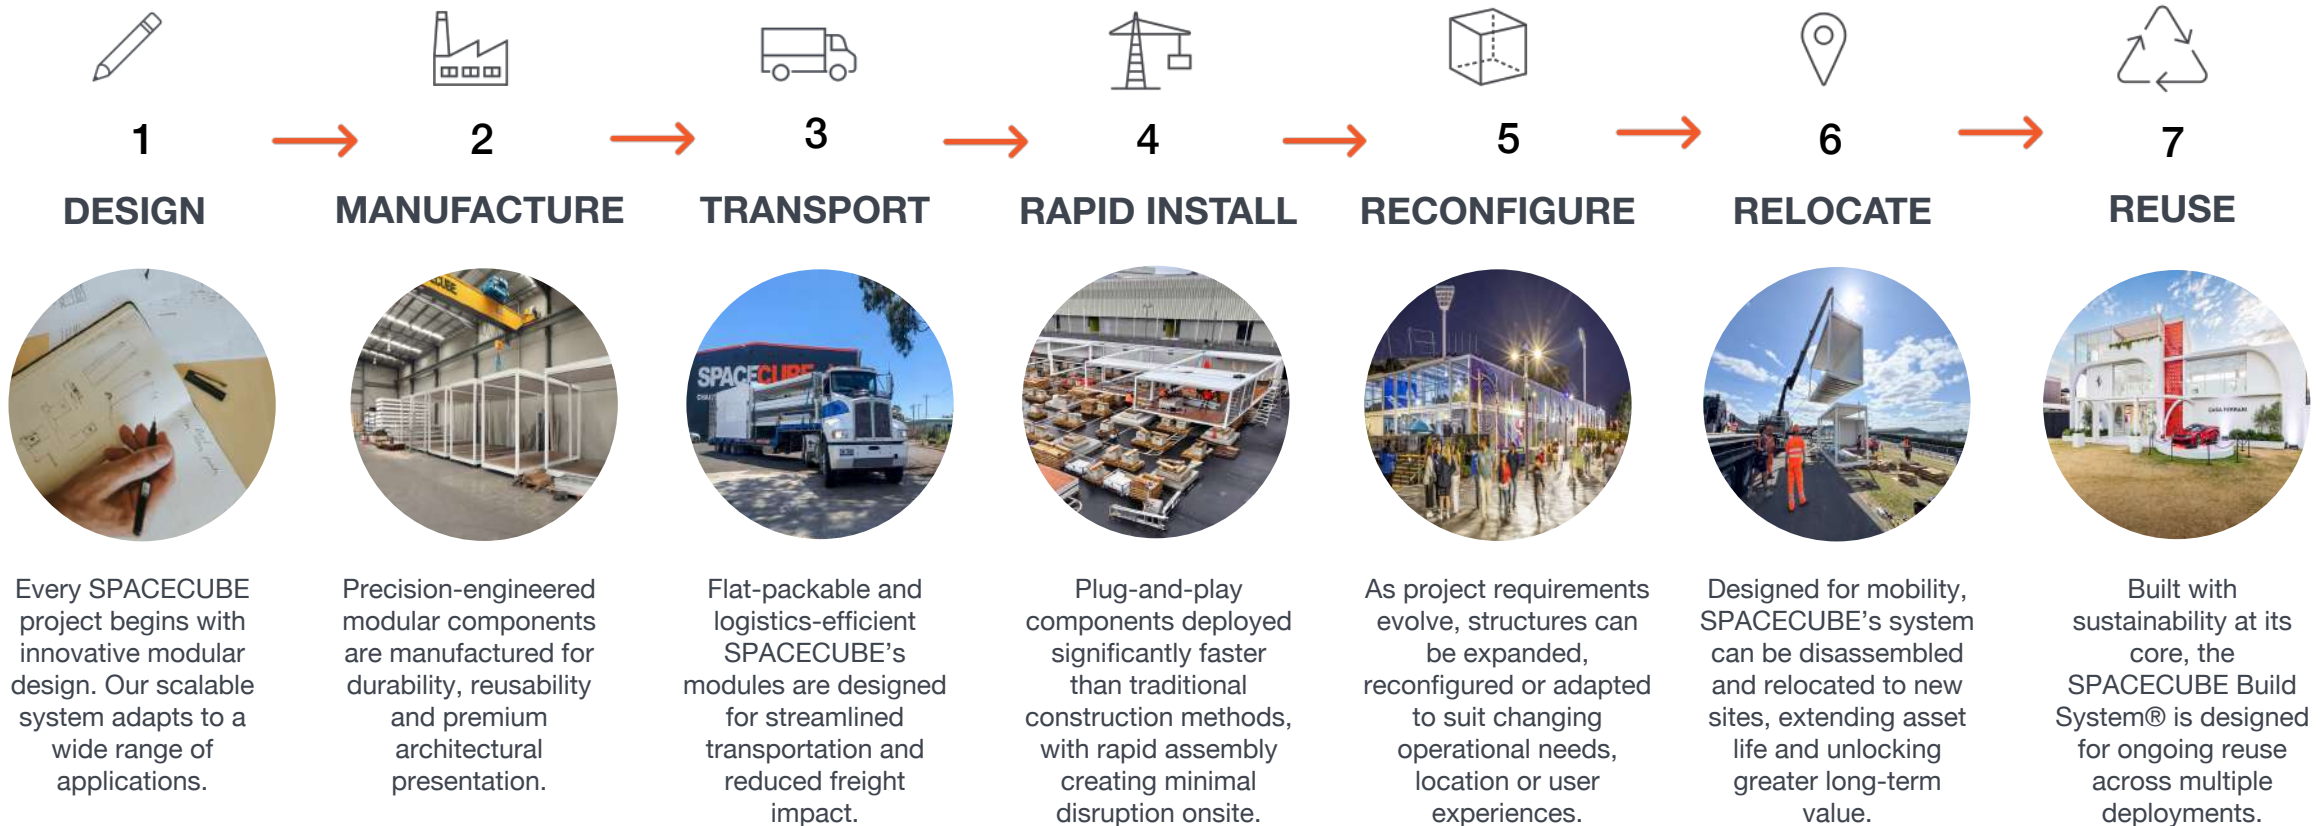

Sustainability is embedded into every stage of the SPACECUBE Build System®. Designed for reuse, relocation and reconfiguration, our modular infrastructure **reduces construction waste**, minimises material consumption and extends asset life across multiple deployments. By building smarter and more efficiently, SPACECUBE helps clients **achieve environmental goals** without compromising on quality, speed or design.

HOW IT WORKS.

THE SPACECUBE BUILD SYSTEM®

A modular approach that delivers premium spaces — faster, smarter and built to be used time and time again.
The SPACECUBE Build System® lifecycle gives clients complete flexibility from first design to final reuse.

SPEED TO MARKET

Deploy premium structures in a fraction of the time required by conventional construction methods.

PREMIUM QUALITY

Every module meticulously engineered for exceptional architectural finish and structural performance.

ONGOING ASSET VALUE

Modular assets that reconfigure, relocate and redeploy — maximising return across the investment lifecycle.

EVENTS + BRAND ACTIVATIONS

Create unforgettable brand experiences with premium modular structures designed for events, activations, exhibitions. SPACECUBE delivers striking, high-quality spaces that can be rapidly deployed, customised to your brand and reconfigured for future campaigns, maximising both impact and return on investment.

“

A massive thanks to the team at Spacecube for their hard work, flexibility, diligence and ‘never give up’ attitude in delivering the MFW Melbourne Town Hall Forecourt. The project was no easy feat, and with what seemed like a roadblock at every turn, the team had the knowledge they needed to get the job done and were a huge support to me personally.

SMITH LANE DEVELOPMENT

An aerial view of a disaster relief camp. Several dark-colored modular units are arranged in a grid-like pattern. A large white truck with a flatbed trailer is parked on the right side. People are walking around the camp. The background is a dense forest of green trees under a cloudy sky.

DISASTER RELIEF.

SPACECUBE's solutions provide premium modular infrastructure for emergency accommodation, medical facilities, community hubs and essential services. Designed for rapid mobilisation and deployment, our modular system helps governments, emergency response agencies, defence organisations and humanitarian groups minimise response times and support communities when they need it most.

A night-time photograph of the SpaceCube exhibition. The building is a long, low structure with large glass windows and colorful, abstract murals on its exterior walls. It is illuminated by bright spotlights, creating a starburst effect. In the background, the stadium lights of a large arena are visible. A crowd of people is walking on a checkered-patterned plaza in front of the building. The overall atmosphere is vibrant and modern.
